- ## Welcome, AXOM Audit User
- Good medicine starts with good attention.
- Command Brief

Learning
- ### Add one real piece of work
- A task, course item, question source, activity, or intention is enough to begin. Shipped examples do not count.
- 0 of 3 setup signals ready
- Add or import one real study item

Next

Gives AXOM concrete work it can rank; shipped examples never count.

Open Course Tracker →

Set today's intention

Next

Adds the outcome you want AXOM to protect today.

Set today's focus →

Start a timer or log an activity

Next

Adds current context without requiring a placeholder task.

Open Productivity →

Optional: import or answer practice questions

Optional

Trusted due questions can become a grounded review action.

Open Question Bank →
- ⚙ Edit dashboard
- ### Daily Check-In
- Before the day runs away from you, what would make today count?
- PRIMARY INTENTION
- e.g. Finish the renal review before lunch

THURSDAY, JULY 16

Welcome, AXOM Audit User

Good medicine starts with good attention.

Command Brief

Learning

Add one real piece of work

A task, course item, question source, activity, or intention is enough to begin. Shipped examples do not count.

0 of 3 setup signals ready

Add or import one real study item

Next

Gives AXOM concrete work it can rank; shipped examples never count.

Choose where to begin

Pick the first place you want AXOM to open. You can use every area later.

YOUR STARTING PLACE

Today's plan

See what matters now and choose a clear next action.

Build my courses

Add courses and organize the material you need to cover.

Import practice questions

Optional: bring in a document or pasted questions, then review them.

What should make today count?

Optional. Choose up to two starters, or choose none and decide later.

Focused study

60 minutes a day

Practice questions

20 questions a day

Daily closeout

One short reflection

Custom later — add schedules and targets when you know what fits.

Data safety

Think of saving AXOM like keeping a game save: your current work stays here, and a portable save file gives you a copy to keep.

Current workspace

AXOM saves your work on this device.

Recovery saves

AXOM creates local safety saves before important updates.

Portable save file

Export a file you can keep and import later.

▶ How saving works

Show the optional seven-step guide after setup

You can skip or replay it later from Help.
