

FTM SG2: HCB Introduction

Dress Code: Professional, casual attire or full scrubs with closed-toed shoes.

Required materials and equipment

1. Pawlina text Chapter 1
2. HCB Lab Supplement - Introduction.pdf (week 1 SG folder)
3. HCB Lab- Introduction.pdf (week 1 SG folder)

How to prepare for this session

1. Complete reading assignment: Pawlina text Chapter 1
2. Review HCB Lab Supplement - Introduction.pdf along with the corresponding HCB Lab Introduction.pdf
3. Develop a basic understanding of the methods and techniques used in histology.
4. Practice presenting slides #38-46 from the HCB Lab Introduction.pdf as if you were presenting to the rest of the small group.

Facilitator and small group evaluations

Note: This is SG2, the HCB Introduction Lab. The primary purpose of the lab is to introduce you to the methods & techniques used in histology and help you learn how to prepare for future small groups. SG2 is unique in that it is the only time the clinical faculty will be primarily responsible for leading the group through the material. All future HCB small groups are student-driven, active-learning sessions. Students are randomly selected to present several slides to the other members of the small group. Clinical faculty facilitate the small group by asking questions and ensuring the small group covers all material.
