

SOM Multicultural Curriculum - Directed Learning Assignment (DLA): Reducing Health Disparities through Knowledge and Understanding

Instructions

Critically read the two articles provided using the objectives as a guide:

Article 1: I'm not putting on that floral gown: Enforcement and resistance of gender expectations for transgender people with cancer – Alpert et al., 2021

Article 2: Racial and Ethnic Disparities in Severe Maternal Morbidity: A Qualitative Study of Women's Experiences of Peripartum Care – Wang et al., 2021

Article 1

I'm not putting on that floral gown: Enforcement and resistance of gender expectations for transgender people with cancer – Alpert et al., 2021

Objectives

- Identify the unique experiences transgender people experience with cancer diagnoses.
- Define implicit bias.
- Discuss how expectations that link anatomy, gender identity, and gender roles create disparities.
- Describe how allyship, and inclusive policies can improve cancer care for transgender individuals.
- Discuss four methods to transform healthcare settings to make them more inclusive.
- Discuss methods to sensitively approach history taking and physical examination with LGBT patients.
- Describe three trans-inclusive policies physicians and healthcare professionals can use to increase engagement and affirm transgender patients.

I'm not putting on that floral gown: Enforcement and resistance of gender expectations for transgender people with cancer. *Patient Education and Counseling*, 104(10), 2552–2558. <https://doi.org/10.1016/j.pec.2021.03.007>

Article 2

Reducing Implicit Bias in Maternity Care: A Framework for Action. *Women's Health Issues*. Siden et al., 2022.

Objectives

- Define Implicit bias.
- Discuss the effects of implicit bias on decision making, treatment and health outcomes of obstetric patients
- Discuss the importance of the domains for change e.g. education and self-awareness, communication skills, and cognitive reframing in improved care.
- Discuss ways in which clinicians and obstetric providers can improve communication with their patients?
- Identify two policies and or strategies, health systems can use to address accountability, and improve care for obstetric patients who have been racialized or made marginal.
