

Origin	Organs	Blood supply	Sympathetics	Parasympathetics
Foregut	Everything from the esophagus — > duodenal papilla (descending duodenum)	Celiac	Greater Thoracic Splanchnic	Vagus
Midgut	Duodenal papilla —> right 2/3 of transverse colon	Superior Mesenteric	Lesser/Least Thoracic Splanchnic	Vagus
Hindgut	left 1/3 of transverse colon —> anal canal to pectinate line	Inferior Mesenteric	Lumbar Splanchnic	Pelvic Splanchnic

*Note, Duodenal Papilla is where the hepatopancreatic duct dumps into the small intestine

Developmental Pathologies

1. Annular pancreas: Strangles duodenum ***Bifid ventral bud***
2. Pyloric Stenosis: Non-Bile vomiting (partial failure of recanalization)
3. Duodenal Stenosis: Bile stained vomiting
4. Duodenal Atresia: Immediate vomiting, polyhydramnios, (complete failure of recanalization) ***Double Bubble!***
