

ER SG3: Endocrine System: Combined SG HCB:BCHM:PHYS

Dress Code: Professional, casual attire or full scrubs with closed toed shoes.

Learning Objectives:

SOM.MK.II.BPM2.1.ER.2.BCHM.1415 Review the pathway of steroid hormone synthesis.

SOM.MK.II.BPM2.1.ER.2.BCHM.1416 Describe the synthesis of thyroid hormones and the role of iodine in this pathway.

SOM.MK.II.BPM2.1.ER.1.PHYS.1400 Evaluate the relationship between anterior pituitary and the hypothalamus and explain how it is useful in clinical diagnosis of their dysfunctions.

SOM.MK.II.BPM2.1.ER.1.PHYS.1401 Apply the biological actions of cortisol and adrenal androgens in explaining the clinical presentations of Cushing syndrome.

SOM.MK.II.BPM2.1.ER.1.PHYS.1402 Predict the consequences of under and over secretion of the thyroid hormones.

SOM.MK.II.BPM2.1.ER.1.PHYS.1403 Compare and contrast clinical features, serum and urinary alterations of calcium, phosphate and vitamin D, and relate them to the alterations in serum parathyroid hormone concentrations.

SOM.MK.I.BPM2.2.ER.1.HCB.1057 List the cells, tissues, organs and associated structures of the endocrine system.

SOM.MK.I.BPM2.2.ER.1.HCB.1058 Present and demonstrate the cells, tissues, organs and associated structures of the endocrine system to the group.

SOM.MK.I.BPM2.2.ER.1.HCB.1059 Apply the histology of the endocrine system to clinical cases and correlations.

SOM.P.I.BPM2.2.ER.6.HCB.1060 Develop both professional skills and presentation skills.

Required materials and equipment:

1. ***Pawlina text Chapter 21:*** Endocrine system

- a. Special attention should be paid to clinical folders (blue boxes)
 2. HCB Lab Supplement Endocrine System.pdf (SG2 folder)
 3. Clinical cases for Endocrine system incorporated into the small group

How to prepare for this session:

- Integrated cases discussion: ~ 90 – 100 minutes
- Complete reading assignments: Pawlina text (Chapter 21)
- Review ER lectures: 01, and other related lectures
- Review the slides found in the Endocrine System Clinical Cases.pdf along with the corresponding HCB Lab Supplement Endocrine System.pdf.

- Practice presenting all slides as if you were presenting to the rest of the small group.
- Facilitator and small group evaluations (at the end of the session) ~ 5 minutes

Note: Integrated small groups are student-driven, active-learning sessions. Students should be prepared to present and discuss the slides found in the Endocrine System Clinical Cases.pdf. Clinical faculty will randomly select students to present slides to the other members of the small group.
