

Special Senses

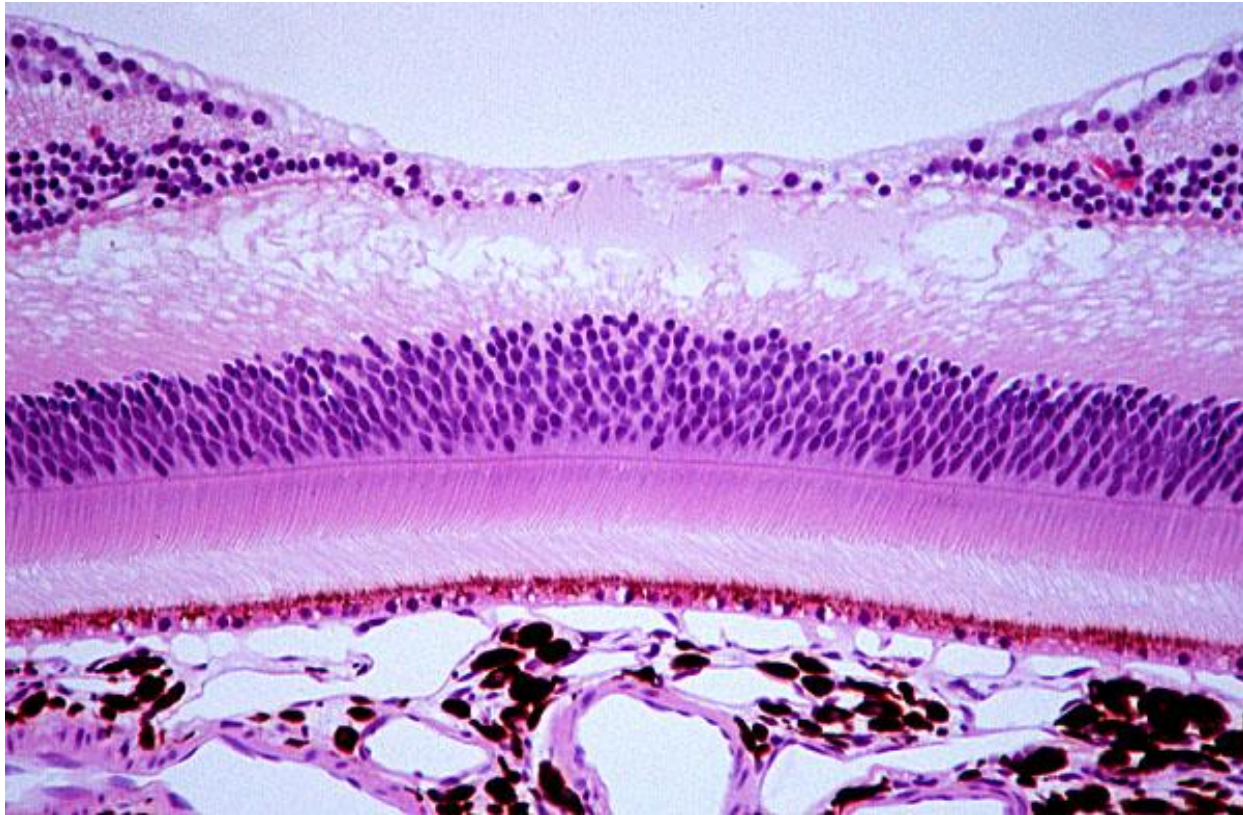

Eye & Ear

Identification

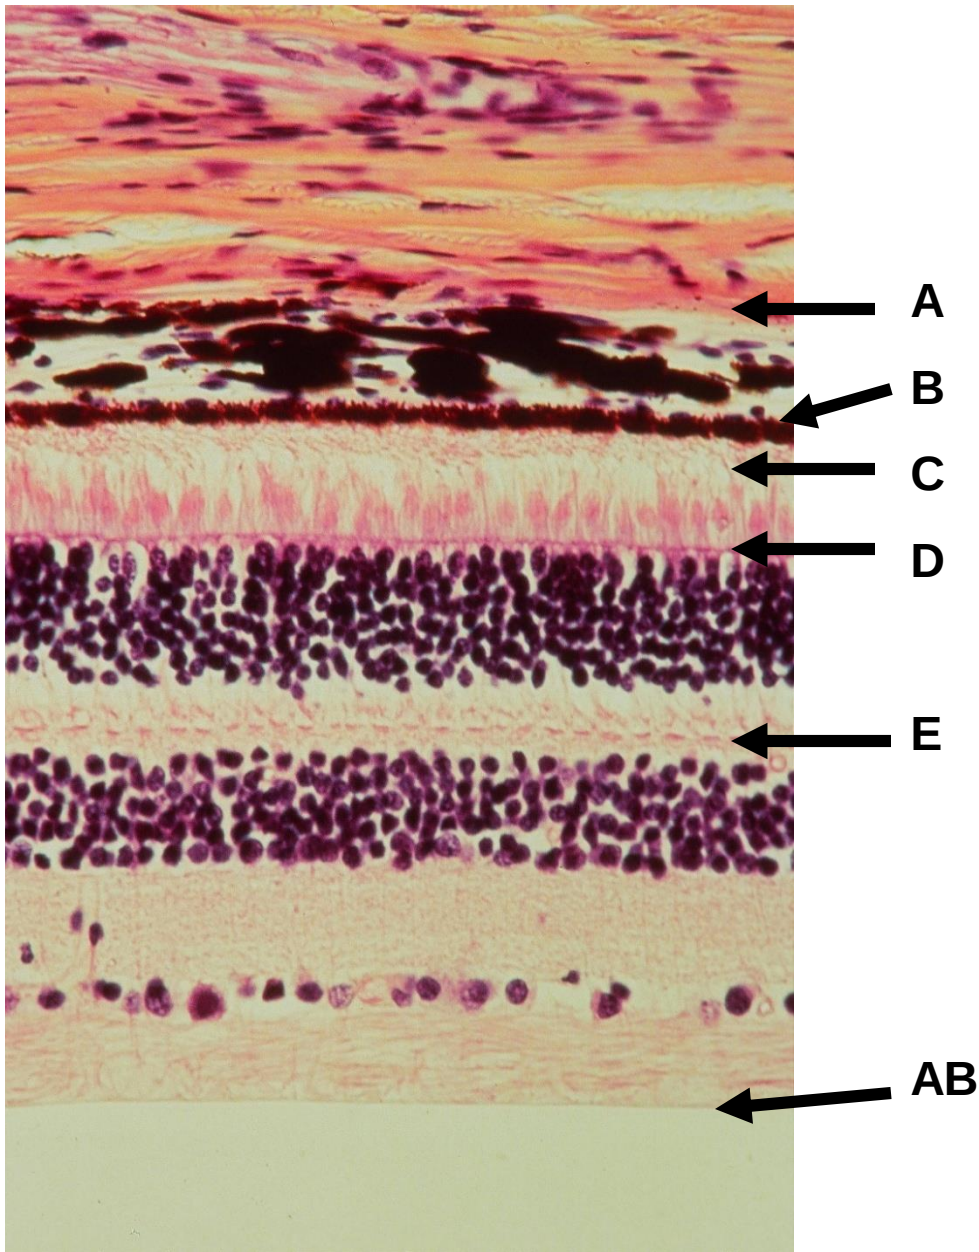

This is an histological section stained by H & E of the _____ in which most of the stromal cells observed are called _____

- A. Eye ; Corneocytes
- B. Sclera ; Hyalocytes
- C. Lens ; Fibrous cells
- D. Cornea ; Keratocytes
- E. Tendon ; Fibrocytes

The concavity of the H&E stained structure depicted in this illustration contains in its sensory zone a high concentration of _____

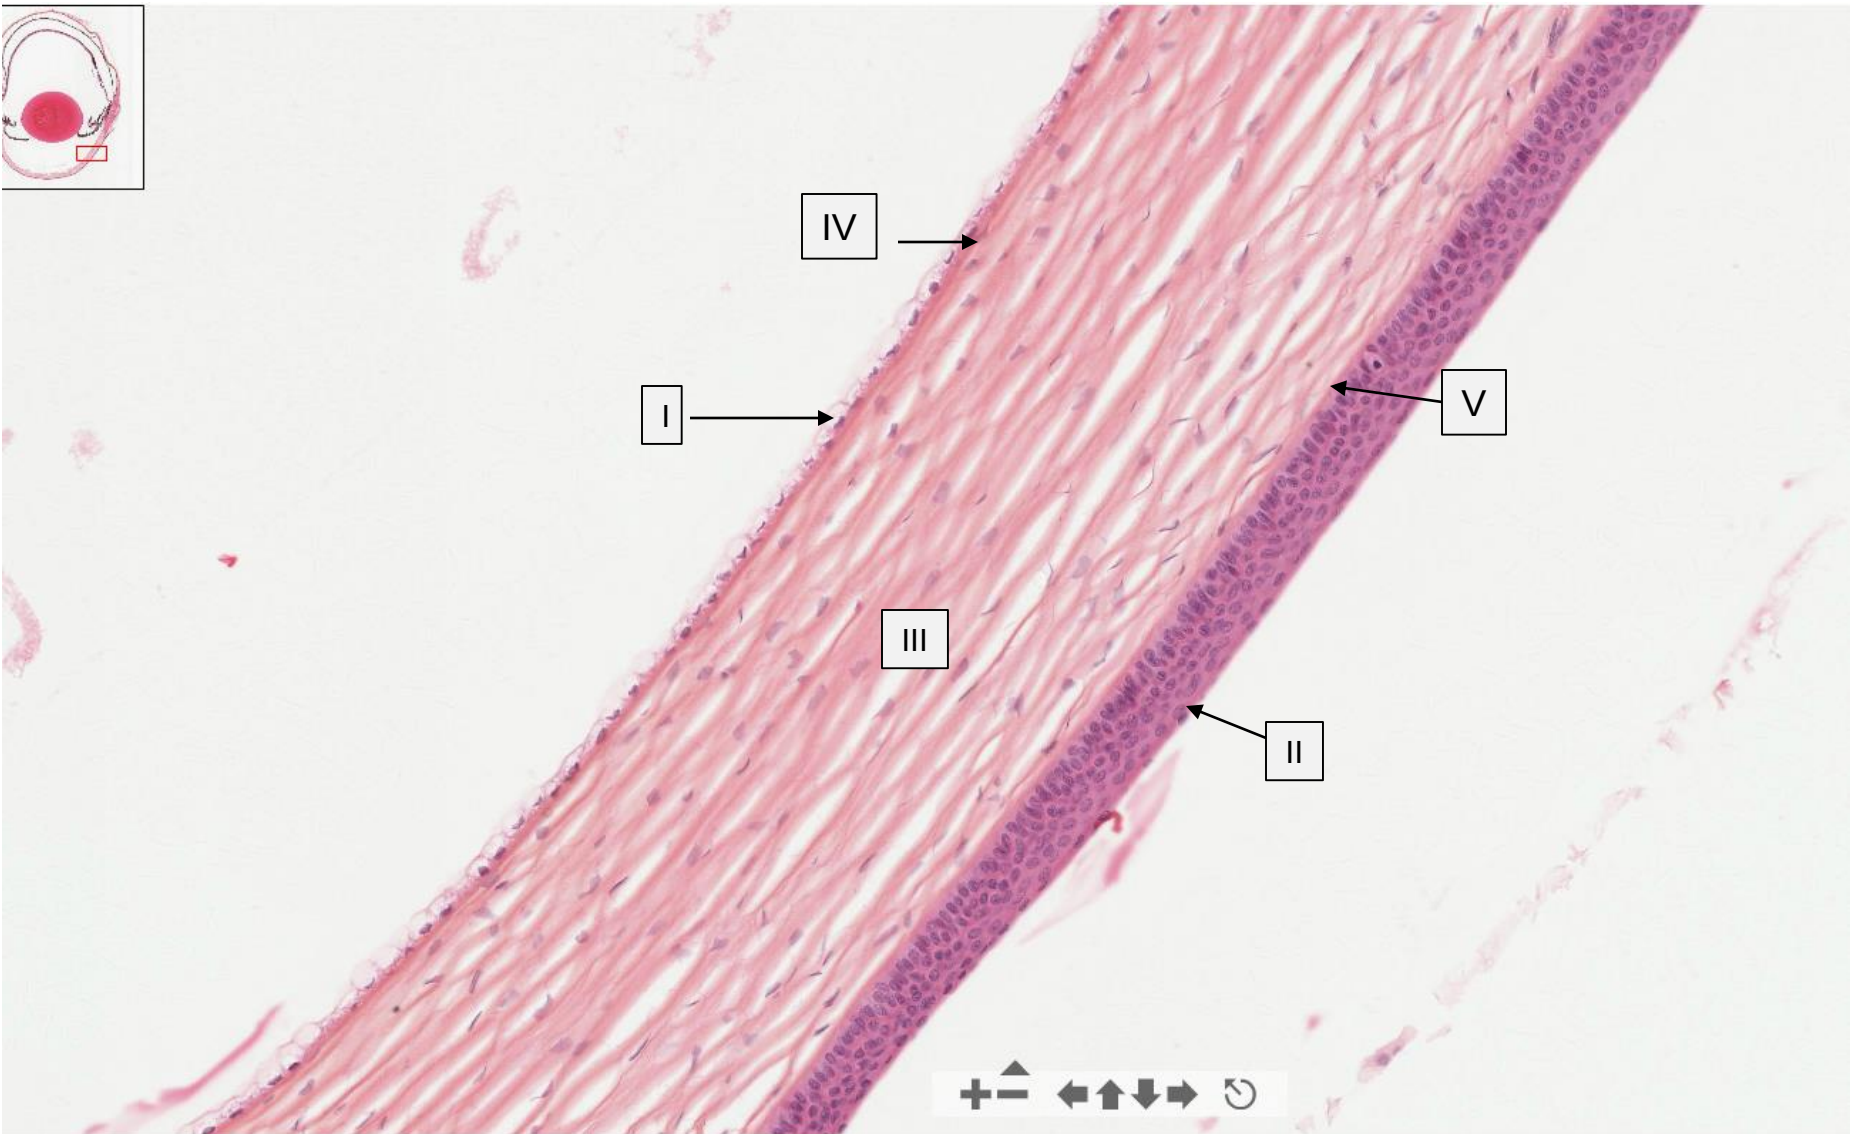

- A. Aqueous humor
- B. Blind cells
- C. Retinal rods
- D. Retinal cones
- E. Pigmented cells

This micrograph was obtained from a sample of this organ stained by H&E.

Choose the lettered arrow that indicates the outer limiting membrane.
