

fSTART DATE: Tuesday September 25th

Rumors of neuro are both true and false. Yes it's hard, but yes you're ready. You've got this. Your brain is excited to learn about itself

**ADDED BOARDS & BEYOND TRACKING LIST AT THE BOTTOM CAUSE THE SCHEDULE IS GETTING CRAZY SAUCE**

**Rewatch B&B 2.1 cerebral cortex, 2.2 spinal cord, 2.3 spinal cord syndromes, 2.4 brainstem, 2.5 cranial nerves over and over and over again**

|                    | Mon                                                                                                                                 | Tue                                                                                                                      | Wed                                                                                                                                                | Thu                                                                                                                                                          | Fri                                                                                                                                                                        | Sat                                                                                                            | Sun                                                                                                                                    |

First aid (2020):As always, it is your bible.

Anki: There is NOTHING. NOTHING. Better for med school than Anki. Push yourself to become in love with Anki. Do it everyday. You'll never regret it.

**BSCE:** Use my “post Term 1” schedule and do 1 day of it per week. There's 20 days on the schedule and 19 weeks in term2 so it lines up almost perfectly. The average person should take between 1-3 hours on this per week. It depends on how strong your term 1 knowledge is and how quickly you watch videos. If term 1 was extra difficult, possible consider adding 10-30 term 1 anki a day IF you're doing okay in term 2. Term2 is priority over bsce1.
