

START DATE: 10/20/20

Rumors of neuro are both true and false. Yes it's hard, but yes you're ready. You've got this. Your brain is excited to learn about itself

	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Week 1 (week 13)		#33 triangles of the neck #34 face & scalp	#35 nasal cavities & chemical senses #36 oral cavity	#37 pharynx & larynx #38 IT & PT fossa	#39 CN 5-7 #40CN 8-12	Review lectures 33-36	Review lectures 37-40
Videos		Triangles			B&B neuro: cranial nerves		Esoft quiz 6
FA pages							
Anki	Anki: Weekly tagged SGU Zanki deck is on drive The anki deck					BSCE review day 10	
		Grays Qs	All Grays Qs Quizlet (do these 2-3 times this week) Grays Qs		Grays Qs	Repeat Grays	Repeat Grays
Week 2 (week 14)	Thanksgiving (Grenada)	#41 #42 hypothalamus	#43 hypothal #44 head & neck embryo 2	#45 clinical head & neck #46 clinical head & neck	#47 human development #48 human dev 2	Review lectures 41-44	Review lectures 45-48
Videos	Rest, like actually.	B&B neuro: 2.8 hypothalamus, thalamus, and limbic system		B&B neuro: 2.11 ventricles & sinuses, 3.4 intracranial bleeds	*there is a great sketchy on human development, but it's a step 2 pediatric video. Ask your upper term friends for it.** B&B behavioral science: 1.10 pediatrics	BSCE review day 11	Esoft quiz 7
FA pages	498, 496	498,496	620-621,326-327 , 493	542, 503, 510, 671,180, 513	635, 272, 510		
Tasks	KEEP DOING GRAYS						
Anki	1 Grays Quizlet						
Week 3 (week 15)	#49 human dev 3 #50 clinical head & neck 3	#51 patient-physician #52 patient centered interview	#53 psychiatric interview #54 classical conditioning	#55 learning theory #56 CBT	Review week 1 & lectures 49-52	Review week 2 & lectures 53-56	
Videos	B&B behavioral science: 1.9 geriatrics		B&B psych: 1.1 conditioning & transference	B&B psych: ego defenses		Esoft quiz 7 BSCE review day 12	Esoft quiz 8
FA pages	272, 270, 562, 523,		554	554, 572,554-555			

	506, 507						
Tasks	KEEP DOING GRAYS						
Anki							
Week 4	Exam 4						

First aid (2020):As always, it is your bible.

Anki: There is NOTHING. NOTHING. Better for med school than Anki. Push yourself to become in love with Anki. Do it everyday. You'll never regret it.

BSCE: Use my “post Term 1” schedule and do 1 day of it per week. There's 20 days on the schedule and 19 weeks in term2 so it lines up almost perfectly. The average person should take between 1-3 hours on this per week. It depends on how strong your term 1 knowledge is and how quickly you watch videos. If term 1 was extra difficult, possible consider adding 10-30 term 1 anki a day IF you're doing okay in term 2. Term2 is priority over bsce1.

[BSCE schedule link](#)

Intro to neuro 1	1.1 cells of the nervous system	Week 1	
	1.2 nerve damage	Week 3	
	1.3 blood brain barrier	Week 2	
	1.4 neurotransmitters	Week 2	
	1.5 dermatomes and reflexes		
Nervous system structures	2.1 cerebral cortex	Week 1	HIGH YIELD
	2.2 spinal cord	Week 2	HIGH YIELD
	2.3 spinal cord syndromes		HIGH YIELD
	2.4 brainstem	Week 2	HIGH YIELD
	2.5 cranial nerves	Week 2	HIGH YIELD
	2.6 auditory system	Week 4	
	2.7 vestibular system	Week 4	
	2.8 thalamus		
	2.9 cerebellum	Week 2	
	2.10 basal gang		
	2.11 ventricles & sinuses	Week 5	
Neurovascular disorders	3.1 cerebral and lacunar strokes		
	3.2 vertebral stroke syndromes		
	3.3 CNS aneurysms		
	3.4 intracranial bleeding	Week 5	
	3.5 management of TIA/stroke	Term 4	
ANS	4.1 ANS	Term 1 & 4	
	4.2 ANS drugs	Term 1 & 4	
	4.3 ANS acetylcholine	Term 1 & 4	
	4.4 autonomic receptors	Term 1 & 4	

The eye	5.1 the pupil	Week 3	
	5.2 the lens	Week 3	
	5.3 the retina	Week 3	
	5.4 eye movements	Week 4	
	5.5 visual fields	Week 4	
	5.6 gaze palseys	Week4	
	5.7 structural eye disorders	Week 4	
	5.8 glaucoma		
6 anestheisa			
7 other neuro topics	7.1 meningitis	Week 2	
	7.2 seizures	Term 4	
	7.3 neuroembryo	Week 1	
	7.4 delirum & dementia	Term 4	
	7.5 demyleinating disease		
	7.6 headaches	Term 4	
	7.7 brain tumors	Term 4	
	7.8 parkinsons	Term 4	
	7.9 HIV CNS infections	Term 4
