****FA pages correlate to 2020 version**

SERIOUSLY THO, DO THE ANKI

Immuno: So heres the thing about immuno, its HARD. Lots to understand, lots to memorize, but she's never too mean with the questions. Major advice is to not panic and focus entirely on immuno just because its difficult. Everything is tested evenly so make sure to share your time between the 3 topics. Also for the love in all that is good and holy, know that IL-8 attracts neutrophils.

-Use B&B videos predominantly. There are really only 5 videos on immuno, so watch them twice!

Update: **Pixorize** has now made a ton of immuno content that is amazing and will be added to the schedule

Biostats/Epi: Depend on external resources to teach you biostats. B&B, anki, first aid, physeo, they're all gonna set you up for success. You'll still need to review lectures for a few things that these sources don't teach you, but it won't be as much as for micro. Lectures are your last priority for biostats.

-Use B&B predominantly

-Use physeo for extra help and practice (<https://physeo.com/biostatistics/>)

Micro: Micro is mostly lecture based for the moment. Please don't bother trying to watch all of sketchy or all of boards for infectious disease. You'll spend all of term 4 going over those. Now is just the basics, so focus on actual lectures.

Anki: PLEASE start using anki this term if you haven't. It's insanely helpful for term 4, but you kinda need a few weeks to get comfortable using it, so term 3 is a great time. I'm working on a youtube video to explain how to set it up.

****Virus video:** This video goes over half of everything you need to know for viruses, memorize it. Watch it 10 everyday.

[https://www.youtube.com/watch?](https://www.youtube.com/watch?reload=9&v=Df_qAFF58Ec&feature=youtu.be&fbclid=IwAR0q6OA1UruEcG-8NH7tJocDaqtQvPTb73xducgToTOWjnCGwBUHNIKP1s)

[reload=9&v=Df_qAFF58Ec&feature=youtu.be&fbclid=IwAR0q6OA1UruEcG-8NH7tJocDaqtQvPTb73xducgToTOWjnCGwBUHNIKP1s](https://www.youtube.com/watch?reload=9&v=Df_qAFF58Ec&feature=youtu.be&fbclid=IwAR0q6OA1UruEcG-8NH7tJocDaqtQvPTb73xducgToTOWjnCGwBUHNIKP1s)

Try splitting resource accounts with a couple people for videos (B&B, pixorize, sketchy, ect)
