**** Sketchy path for renal is AWESOME, start watching every one week 2 for an extra boost*** Renal path is very difficult and it'll help a lot.**

If anki becomes overwhelming, prioritize path anki. You have sketchy for pharm and micro*

JUST ADDED SKETCHY PATH FOR CARDIO & VASCULAR. Cardio sketchy path isn't my favorite so I made it optional.

2 rules: You must watch **pathoma** and **you must watch sketchy**. Anything else is negotiable.

Sketchy: The key to sketchy is to get 3 passes on each video before the exam, So start them the week before you learn them in class. They WILL cover more than you need to know for the first exam, since you'll learn more about each micro in each body system. Do yourself a favor and learn it all now, and you'll know it for later

Pathoma: on the other hand is an amazing post/pre-read that only need to be annotated/watched once (key for path lab)

SGU specific

G's get general path module (1-4):Gs Get Path

GET ZANKI, do it every day, no matter what, do at least 100 new cards and 300 reviews every day.

"Student, you do not study to pass the test. You study to prepare for the day when you are the only thing between a patient and the grave."

- Mark Reid
